## QUALITY POLICY

**CHASE ALLOYS LIMITED** specialise in the supply of alloy steel, non ferrous metals and associated machined components to customers requiring small to medium quantities of standard specification material and product, although sufficient stock levels are maintained to supply larger quantities of material when required.

The Company reputation has been built on the foundation of material availability and our quick response to customer requirements. Whilst every effort is made by us to deliver on time and in full, the fluid nature of the industry we work within sometimes means that we cannot always guarantee this delivery performance. Our customers, however, can rest assured that we will always do our best to fulfil our contractual obligations.

**CHASE ALLOYS LIMITED** is committed to the operation of a Quality Management System which enables us to provide Quality Assured goods and services to meet the needs and expectations of our interested parties, and relevant compliance obligations. This is accomplished by holding regular meetings and setting objectives and targets for continual improvement in performance and resources in order to meet current and future customer and regulatory demands.

To ensure consistent performance to the specified requirements the Company implements an effective Quality Management System meeting the requirements of :-

### **BS EN ISO 9001 : 2015**

The Quality Management System is documented, detailing and communicating working instructions to Company employed personnel, and where necessary demonstrating various quality processes to our external interested parties.

Leadership and commitment is demonstrated by our Management Team through the provision of the resources necessary for the quality system to meet its intended outcomes. All personnel with the organisation are trained in quality processes, are aware of this quality policy and accept responsibility for the quality of work they produce. The performance of the quality management system is formally evaluated at annual management review meetings.

Signed

P. Wright  
Managing Director
